

## Challenging Issues in TKA

Scientific Chairman: Dr. Keyvan Ahadi

مکان: بیمارستان آتیه ۲، سالن آپادانا

زمان: پنجشنبه ۲۹ مرداد ۱۴۰۵

| Opening Lecture                                                                                                                                                          |                             |             |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|-------------|
| Greetings                                                                                                                                                                | Dr. Keyvan Ahadi            | 08:00-08:05 |
| Session A: Painful TKA                                                                                                                                                   |                             |             |
| Chairman: Dr. Ali Torkaman                                                                                                                                               |                             | 08:05-10:00 |
| The painful TKA, where should we start, a diagnostic algorithm                                                                                                           | Dr. Fardis Vosoughi         | 08:05-08:15 |
| Is it infected?                                                                                                                                                          | Dr. Hamidreza Yazdi         | 08:15-08:25 |
| Is it loosening?                                                                                                                                                         | Dr. Hosein Akbari Aghdam    | 08:25-08:35 |
| Is it malalignment or extensor mechanism problem?                                                                                                                        | Dr. Mohammad Banasiri       | 08:35-08:45 |
| Is it malrotation or patellofemoral problem?                                                                                                                             | Dr. Hesam Toofan            | 08:45-08:55 |
| When the knee looks normal but it is painful                                                                                                                             | Dr. Babak Haghpahan         | 08:55-09:05 |
| Q & A                                                                                                                                                                    |                             | 09:05-09:20 |
| Panel discussion 1                                                                                                                                                       | Dr. Hoseinali Hadi          | 09:20-10:00 |
| Panel Members: Dr. Morteza Kazemi, Dr. Shahram Shirvani Boroojeni, Dr. Farzad Amouzadeh, Dr. Abolfazl Bagherifard, Dr. Arash Sherafat Vaziri, Dr. Mohammad Mahdi Omidian |                             |             |
| Break                                                                                                                                                                    |                             | 10:00-10:30 |
| Session B: Simultaneous bilateral TKA                                                                                                                                    |                             |             |
| Chairman: Dr. Mohammad Mahdi Sarzaeem                                                                                                                                    |                             | 10:30-12:30 |
| Why I prefer simultaneous bilateral TKA?                                                                                                                                 | Dr. Mohammad Ayati          | 10:30-10:40 |
| Why simultaneous bilateral TKA should be restricted?                                                                                                                     | Dr. Ali Shahsavari          | 10:40-10:50 |
| How to perform bilateral TKA (simultaneous or staged)?                                                                                                                   | Dr. Ahmad Ramezani          | 10:50-11:00 |
| When should we avoid bilateral TKA?                                                                                                                                      | Dr. Mehran Soleymanha       | 11:00-11:10 |
| What does current evidence really say?                                                                                                                                   | Dr. Mahammadjavah Mortazavi | 11:10-11:20 |
| Q & A                                                                                                                                                                    |                             | 11:20-11:35 |
| Panel discussion 2                                                                                                                                                       | Dr. Mohammad Mahdi Sarzaeem | 11:35-12:30 |
| Panel Members: Dr. Mahmoud Karimi Mobarakeh, Dr. Sohrab Keyhani, Dr. Hooman Yahyazadeh, Dr. Mehrdad Sadighi, Dr. Sina Talebi, Dr. Amirmohsen Khorami                     |                             |             |
